

INGECON SUN Monitor

Web portal for PV plant access

With the INGECON® SUN Monitor software, PV plant data can be accessed from any PC with an Internet connection (www.ingeconsunmonitor.com). Its ease of access facilitates owner, installer or promoter plant control. This software provides information on the PV

plant status and production, either in list and graphic format or through an e-mailed production report. This software has been designed to facilitate owner, installer or promoter plant control, providing information on the PV plant status in the form of lists and graphs,

whilst there is also the possibility of receiving an e-mailed production report. Data are recorded and stored throughout the useful life of the inverter. An iSun Monitor iPhone application is available at the App Store.
